

The Federal Government should not be allowed to interfere with our State's right to grant us the ability to block unwanted, unnecessary, annoying, aggravating, telemarketing calls from entering into our homes.

We have chosen to block these calls and that should be honored by the Federal Government.

Older adults should not have to be intimidated upon answering the telephone that they will be pressured into sales or gimics by these people who prey upon the elderly.

Thank you for your consideration regarding this matter.
